

**We make travelling easier for you and the Earth.  
Energy efficiency the Mitsubishi Electric way.**

Namma Metro, Bangalore

## The World-Class Sustainable Technology Company.

Traction Inverter

Rapid development in Bangalore, India's IT hub, has led to serious problems of pollution and traffic congestion. To resolve these issues, a Metro System adopting pioneering know-how from Mitsubishi Electric was introduced. Mitsubishi Electric's high-integrity electric railcar technology controls and monitors safe, accurate operations even under the city's harsh conditions and its power-saving inverters contribute significantly to the environment. These advanced technologies from Mitsubishi Electric help protect the Earth while helping Bangalore to commute comfortably in time. For reliable performance, Delhi, Mumbai and Jaipur Metros showcase Mitsubishi Electric solutions used in more than 27,000 railcars in 25 countries worldwide. Look to Mitsubishi Electric for a greener tomorrow.
